EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Electronics and Communication

Sept 2022 – Apr 2026

CGPA: 8.71

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (ES6+), SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **AI & LLM:** RAG Pipelines, Prompt Engineering, LLM Integration, Embeddings
- **Databases:** MongoDB, ChromaDB, Schema Design, Indexing, Query Optimization
- **Cloud & DevOps:** AWS (S3, CloudFront, Lambda, API Gateway, SAM), Docker, CI/CD
- **Software Engineering:** Data Structures & Algorithms, OOPs, Event-driven Architectures
- **Tools:** Git, GitHub, Postman, VS Code, IntelliJ IDEA, API Testing, Debugging

PROJECTS

- StudyNotion – EdTech Platform** 🌐 | React, Node.js, MongoDB, AWS Lambda, Razorpay Nov 2025
- Built and **deployed** a full-stack EdTech platform with **3 roles** (student, instructor, admin) supporting course creation, purchase, and video consumption with progress tracking.
 - Deployed on a **fully serverless AWS architecture** – React frontend on **S3 + CloudFront CDN**, backend on **AWS Lambda + API Gateway**, provisioned via **AWS SAM** (infrastructure-as-code).
 - Secured **35+ APIs** using JWT, OTP verification, password reset, and RBAC; integrated **Razorpay** payment gateway with signature verification for course purchases.
 - Integrated **Cloudinary** for media storage and **MongoDB Atlas** as cloud database.
- 4-in-a-Row – Real-Time Multiplayer Game** 🌐 | React, Node.js, Socket.IO, MongoDB, Kafka Jan 2026
- Developed a real-time multiplayer Connect-Four game using **WebSockets (Socket.IO)**, enabling seamless player-vs-player gameplay.
 - Designed an intelligent **AI bot** with heuristic-based decision-making to strategically win, block opponents, and optimize moves.
 - Implemented a robust **reconnection system** with state recovery and timeout-based forfeits to handle network disruptions effectively.
 - Built an event-driven analytics pipeline using **Kafka** to track game events, player statistics, and performance metrics in real time.
- AI-Adaptive Onboarding Engine** 🌐 | React, Node.js, MongoDB, Groq, ChromaDB Mar 2026
- Built a full-stack MERN application that analyzes candidate resumes against job descriptions and identifies skill gaps using a **Retrieval-Augmented Generation (RAG)** pipeline.
 - Integrated **Gemini Embeddings** with **ChromaDB** to perform semantic course retrieval and recommend the most relevant learning resources based on candidate skill deficiencies.
 - Engineered a multi-stage AI workflow using **Groq Llama-3.3-70B** for skill extraction, gap analysis, personalized learning pathway generation, and structured reasoning.
 - Implemented a **grounding and validation layer** to verify AI-generated course recommendations against retrieved results, reducing hallucinations, and persisted analyses.

ACHIEVEMENTS

- **Odoo Hackathon 2025:** Finalist among 19,000+ participants at Gandhinagar, Gujarat.
- **GeeksforGeeks:** Solved 550+ DSA problems across GeeksforGeeks and LeetCode.

CERTIFICATIONS

- OCI Foundations – Oracle
