EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Electronics and Communication

Sept 2022 – Apr 2026

CGPA: 8.71

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+, OOJS), HTML5, CSS3, SQL
- **Frontend:** React.js, Tailwind CSS, Responsive Design, Component Architecture)
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL, ChromaDB – schema design, indexing, query optimisation
- **Cloud & DevOps:** AWS (S3, CloudFront, Lambda, API Gateway, SAM), Docker, CI/CD pipelines
- **Tools:** Git, GitHub, Postman, VS Code, Chrome DevTools, API Testing & Debugging

PROJECTS

StudyNotion – Full-Stack EdTech Platform 📄 | *React, Node.js, Express, MongoDB, AWS* Nov 2025

- Built a fully responsive React frontend with **role-based UI** for 3 user types (student, instructor, admin) – implementing stateful and stateless component architecture for clean separation of concerns.
- Designed reusable component library using **React.js + Tailwind CSS** with dynamic routing via React Router DOM, supporting course creation, video consumption, and progress tracking flows.
- Deployed React frontend on **AWS S3 + CloudFront CDN** for global low-latency delivery; integrated **Razorpay** payment UI with real-time confirmation feedback.
- Integrated **35+ REST APIs** with JWT-based auth, OTP verification, and RBAC; handled async state with clean loading/error UI patterns.

Quick Court – Sports Venue Booking Platform 📄 | *React, MongoDB, Express.js, Node.js* August 2025

- Built a full-stack sports venue booking platform serving **3 roles** (users, venue owners, admins) with features for venue discovery, real-time slot booking, and revenue tracking.
- Developed **interactive React dashboards** with Chart.js for booking analytics, revenue reports, and user activity – applying OOJS principles for reusable, maintainable UI logic.
- Implemented **responsive UI** with Tailwind CSS across all device sizes; built complex interactive components including booking calendars, image galleries, and map integrations.
- Consumed **40+ REST APIs** with Axios; implemented JWT auth flow, OTP verification UI, and RBAC-based conditional rendering across the frontend.

Wall Calendar – Interactive React Component 📄 | *React, Canvas API, useReducer* Apr 2026

- Built a polished interactive wall calendar with **12 unique month themes** – each with custom gradient palettes, accent colors, mood labels, animated floating icons, and a Canvas API particle background re-initialized per theme.
- Engineered **drag-to-select date range logic** using useReducer with MMR-style reverse drag support; implemented per-range and month-level **tabbed notes panel** with **localStorage** session persistence.
- Architected with **custom hooks** (useCalendar, useDateSelection) for clean state separation; applied **React.memo** on DayCell and ParticleCanvas to prevent unnecessary re-renders.
- Delivered **fully responsive layout** (side-by-side on desktop, stacked on mobile) with CSS-in-JS global stylesheet, flip animation on month navigation, holiday markers, and a today indicator – deployed live on Vercel.

ACHIEVEMENTS

- **Odoo Hackathon 2025:** Finalist among 19,000+ participants at Gandhinagar, Gujarat.
- **DSA Proficiency:** Solved 750+ problems across GeeksforGeeks and LeetCode.

CERTIFICATIONS

- OCI Foundations – Oracle
