EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Electronics and Communication

Sept 2022 – Apr 2026

CGPA: 8.71

TECHNICAL SKILLS

- **Languages:** Java (Core + Java 8+), SQL, JavaScript (ES6+)
- **Java Ecosystem:** Spring Boot, Spring MVC, REST APIs, JWT Authentication
- **Databases:** MySQL, MongoDB, ChromaDB – schema design, indexing, query optimisation
- **Cloud & DevOps:** AWS (S3, CloudFront, Lambda, API Gateway, SAM), Docker, CI/CD pipelines
- **Backend & Architecture:** Microservices, Event-driven Architecture, OOP principles, Design Patterns
- **AI / LLM Integration:** RAG Pipelines, Prompt Engineering, LLM APIs, Vector Databases, Embeddings
- **Tools:** IntelliJ IDEA, Git, GitHub, Postman, VS Code, API Testing & Debugging

PROJECTS

- StudyNotion – Full-Stack EdTech Platform** 🌐 | *Node.js, Express, React, MongoDB* Nov 2025
- Built and deployed a full-stack EdTech platform with **3 roles** (student, instructor, admin) supporting course creation, purchase, and video consumption with progress tracking.
 - Implemented **35+ secured REST APIs** using JWT, OTP verification, password reset, and RBAC – following Spring Security best practices.
 - Deployed on a **fully serverless AWS architecture** – React frontend on S3 + CloudFront CDN, backend on AWS Lambda + API Gateway, provisioned via **AWS SAM** (infrastructure-as-code).
 - Integrated **Razorpay** payment gateway with signature verification; used Cloudinary for media storage and **MongoDB Atlas** as cloud database.
- Quick Court – Sports Venue Booking Platform** 🌐 | *MongoDB, Express.js, React, Node.js* May 2026
- Built a full-stack sports venue booking platform serving **3 roles** (users, venue owners, admins) with features for venue discovery, real-time slot booking, and revenue tracking.
 - Designed and implemented **40+ REST APIs** across user, venue, booking, rating, and sports modules with **JWT-based authentication**, OTP email verification, RBAC, and bcrypt password encryption.
 - Developed **venue management system** with multi-court support, availability toggling, Google Maps integration, admin approval workflow, and Cloudinary-based image storage.
 - Built **analytics dashboards** for owners and admins featuring booking history, revenue reports, user activity tracking, and interactive charts using Chart.js.
- AI-Adaptive Onboarding Engine** 🌐 | *Rag, React, MongoDB, ChromaDB, Groq* Mar 2026
- Built a full-stack app with an **end-to-end RAG pipeline** – LLM extracts skill gaps from resume + JD, a **custom hash-based embedding engine** converts text to vectors, and ChromaDB retrieves top-12 courses via cosine similarity.
 - Engineered **custom offline embeddings** using character-level n-gram hashing – zero external API cost.
 - Orchestrated **multi-step LLM workflow**: skill extraction → embedding → vector retrieval → personalised learning pathway generation using **Groq Llama-3.3-70B**.
 - Implemented **grounding layer** to validate course IDs against the retrieved set, preventing hallucinated recommendations; persisted results in **MongoDB** with **Docker Compose** for ChromaDB.

ACHIEVEMENTS

- **Odoo Hackathon 2025:** Finalist among 19,000+ participants at Gandhinagar, Gujarat.
- **DSA Proficiency:** Solved 750+ problems across GeeksforGeeks and LeetCode – strong foundation in Java-based problem solving.

CERTIFICATIONS

- OCI Foundations – Oracle
